

Ali Abdo

Data Analyst

London, UK • +44 7498 341970 • alihusabdo@gmail.com

aliabdo.dev / [LinkedIn](#) / [GitHub](#)

Data analyst with hands-on experience turning operational data into clear reporting using SQL, Excel and Power BI. First-Class Computer Science graduate with experience in ETL workflows, data quality and customer analytics, supported by independent data projects. Comfortable working with real-world datasets and communicating findings to non-technical stakeholders.

01 Experience

Data Analyst | Scaffling

Jun 2024 – Jul 2026

Remote • Scaffold inspection and compliance SaaS

- Built and maintained Power BI dashboards to monitor business performance, customer activity and platform usage.
- Used SQL and PostgreSQL to extract, join and aggregate data for recurring reports and ad hoc analysis.
- Developed ETL workflows to consolidate application, billing and CRM data, processing API and JSON data and automating preparation with Python and pandas.
- Cleaned and validated datasets through deduplication, missing-value handling, standardisation and reconciliation; investigated reporting discrepancies.
- Analysed onboarding funnels, customer cohorts, feature adoption and engagement, including usage before and after product releases.
- Tracked subscription revenue, active tag usage, retention and churn, alongside inspection completion trends and overdue inspections.
- Worked with product, sales and customer support stakeholders to define KPIs, respond to data requests and present findings and recommendations.
- Documented data sources, metric definitions and transformation logic; maintained SQL queries and analysis scripts using Git.

02 Technical Skills

Analytics SQL, Excel, Power BI, Python, pandas, R, dbt, statistical testing

Data workflows ETL, APIs, JSON, data cleaning, validation, PostgreSQL

Development Java, Dart, JavaScript, HTML/CSS/Sass, React/Next.js, Node.js

Tools and methods Git/GitHub, Firebase, MongoDB, VS Code, Figma, Scrum, Agile

03 Selected Work

Retail Sales and Customer Insights Dashboard

SQL • Excel • Power BI

- Cleaned and modelled a public retail transactions dataset in SQL for reliable reporting.
- Built an interactive dashboard showing sales trends, top-performing products and customer segments; documented sources, assumptions and refresh logic.

Data Pipeline and Transformation Project

dbt • SQL • PostgreSQL

- Transformed raw relational data through staging and modelled layers into clean, tested tables using dbt.
- Wrote SQL-based tests and documentation, with Git version control to track model changes.

Marketing Campaign A/B Test Analysis

Python • pandas • Statistical testing

- Analysed a public A/B test dataset to compare campaign performance and applied hypothesis testing to assess statistical significance.
- Presented findings and a recommendation in a written summary.

GravityIQ Football Analytics Platform

React • Node.js • Python

- Built a full-stack analytics platform combining multiple data sources into one analytical view.
- Designed the Gravity Index statistical metric and validated it using regression and hypothesis testing; built radar charts and positional maps to communicate findings.

04 Education

Royal Holloway, University of London

Sep 2023 – Jul 2026

BSc Computer Science: First-Class Honours | Egham, UK

Coursework: Software Engineering, Algorithms and Complexity, Security Management, Operating Systems, Database Systems, Project Management.

Uxbridge College

Sep 2021 – Jul 2023

BTEC Level 3 National Extended Diploma in Information Technology: D*DD | London, UK

Coursework: Creating Systems to Manage Information, Big Data and Business Analytics, Cyber Security, IT Service Delivery.

05 Certificates

Microsoft: Data Analysis with SQL, Excel & Power BI

IBM: Data Analyst Professional Certificate

British Airways: Data Science Job Simulation

06 Languages

English and Arabic (fluent)
